

SAUK PRAIRIE SMALL ANIMAL HOSPITAL

Dr. Joseph E. Kelley, DVM

MICROCHIP CONSENT FORM

HomeAgain Microchip- Pet Microchip Identification System and Recovery Service is the most complete nationwide system for recovering lost or stolen pets. It utilizes a tiny microchip, the size of a grain of rice, which is implanted between your pet's shoulder blades. Individual numbers are registered in the national database managed by the HomeAgain Pet Recovery Service. When a lost pet (cat, dog, bird, etc.) arrives at a participating animal shelter or veterinary clinic, a Universal Scanner is used to identify the unique encoded number on the implanted microchip and the owner is identified and contacted immediately. This procedure takes just seconds and is relatively painless, and is recommended for companion pets of all species, breeds and ages.
